

Q1

Create a Card visual with Sales field summarized as Sum to display Total Sales.

Q2

Create a Donut Chart: Legend=Ship Mode, Values=Sales. The largest slice represents the highest sales.

Q3

Create a Line Chart: Axis=Order Date (Month-Year), Values=Sales. Observe peaks and seasonal trends.

Q4

Create a Bar Chart: Axis=Category, Values=Sales to compare categories.

Q5

Create a Matrix: Rows=Month, Columns=Category, Values=Sales. Highest value indicates top month.

Q6

Create a Decomposition Tree: Analyze=Sales; Explain by Country, Category, Sub-Category, Segment.

Q7

Scatter Chart: X=Discount, Y=Profit, Details=Sub-Category. Identify points with high discount and negative profit as outliers.

Q8

Funnel Chart: Group=Customer Segment, Values=Count of Order ID.

Q9

Waterfall Chart: Category=Country then Category, Y-axis=Profit to analyze changes.

Q10

Dual-axis Line Chart: Axis=Month, Values=Sales and Profit using secondary axis.
